1. Several observation posts about two kilometers apart, equipped with range finders and telescopes, were seen between Burgas and Vasiliko. Three motor torpedo boat nests, dug into the shore and heavily camouflaged, were also noticed near Burgas. In two of the nests there were six motor torpedo boats, believed to be ex-German, which had two torpedo tubes, depth charges and a greenish-gray camouflage.
2. It is reported that at the beginning of October, one of the motor torpedo boats blew up near Vasiliko. Another is undergoing repairs at the Bulgarian-Lloyd shipyards. The crews of these vessels are said to be inexperienced and incapable of handling them in action; they are, however, being trained intensively and engaging in night exercises.
3. The waters around Burgas are heavily mined, and more mines are believed to have been sown during recent months.
4. The Russians are believed to be operating submarines between Varna and Balchik.
